

KAMION PHARMA

ABOUT US

Kamion Pharma is proud to unveil Pakistan's first premier manufacturing facility dedicated to advanced wound care, setting a new standard with our commitment to current Good Manufacturing Practices (cGMP) and adherence to ISO global standards.

Our high speed and state of the art manufacturing facility guarantees precision, efficiency and excellence in every product we deliver.

We employ advanced sterilization techniques including Electron Beam, Gamma Radiation and Ethylene Oxide, to ensure the safety, effectiveness and quality of our wound care products. By adhering to international standards, we aim to not only offer exceptional care but also lead the way in the evolution of wound care management in Pakistan and around the world.

MISSION

VISION

VISION

To lead in innovative wound care solutions that enhance the quality of life for patients worldwide.

MISSION

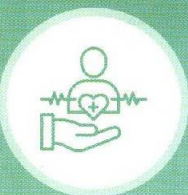

Designing, developing and delivering innovative wound care solutions through cutting-edge technology, superior quality and commitment to global health standards that make a meaningful difference in the life of patients, HCPs and communities.

CORE VALUES

Innovation & Excellence

We are committed to provide advanced wound care through innovative technologies ensuring the highest quality products that meet global standards.

Patient - Centric Care

Our products are designed with the patients in mind, delivering effective solutions that promotes faster healing and improves quality of life.

Integrity & Trust

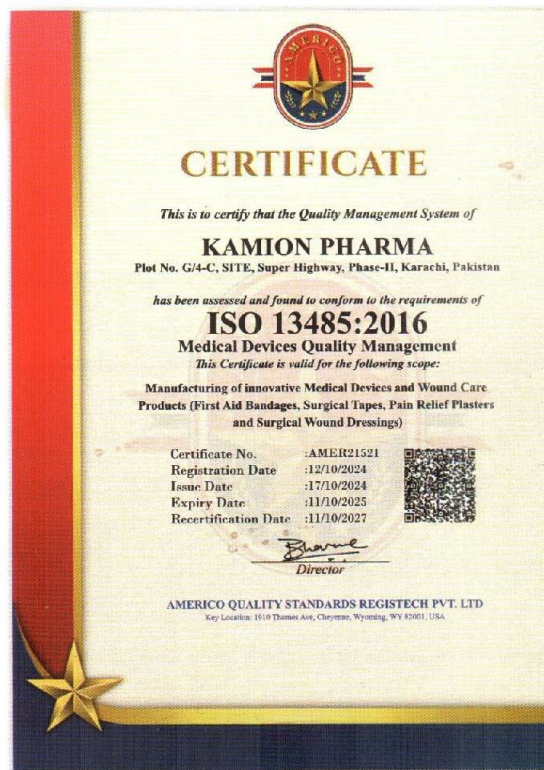

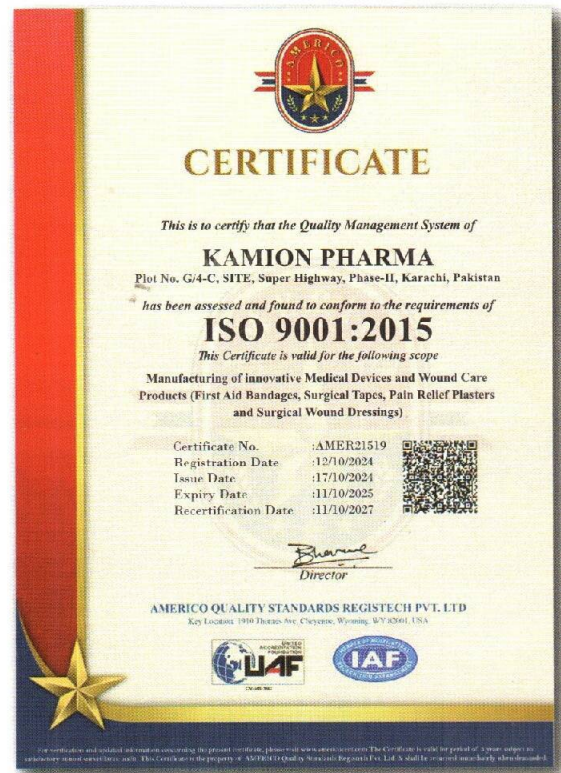

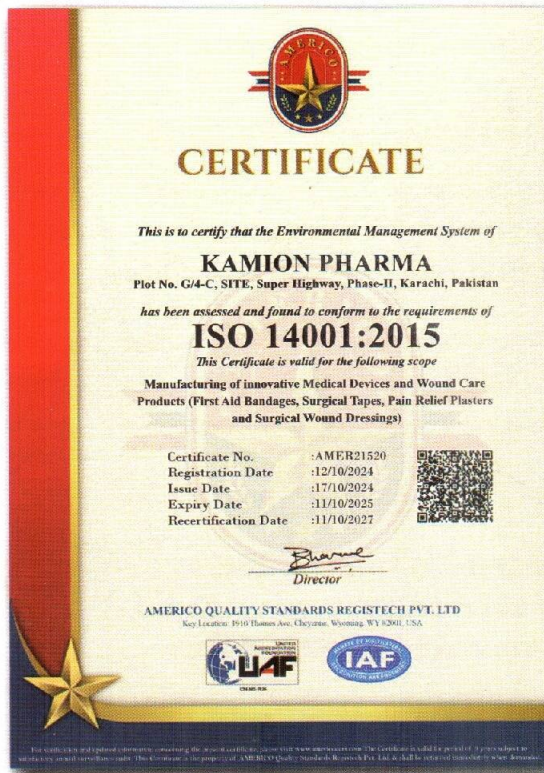

We uphold the highest ethical standards fostering trust with healthcare professionals, patients and business partners.

Sustainability & Responsibility

We are dedicated to sustainable practices that ensure the wellbeing of patients and the environment while driving responsible growth in the healthcare industry.

ADVANCED STERILE WOUND DRESSINGS

- Kamistat Haemostatic Rapid Clot
- Aquasorb
- Algi Heal

KAMISTAT HAEMOSTATIC RAPID CLOT

Chitosan Haemostatic Gauze

Kamistat Haemostatic Rapid Clot is a Z folded gauze consisting of Chitosan granules on stable viscose wide gauze designed to stop severe arterial bleeding within minutes of compression.

Features :

- Stop bleeding by rapid haemostatic effect.
- Wound sealing and promote wound healing.
- Antibacterial and diminish inflammation.
- Natural Polysaccharide.
- PH value 7 so does not cause any skin irritation.
- Anti-tissue adhesion.
- X-ray detectable thread.
- Sterilized by Electron-Beam radiation.

Clinical Cases :

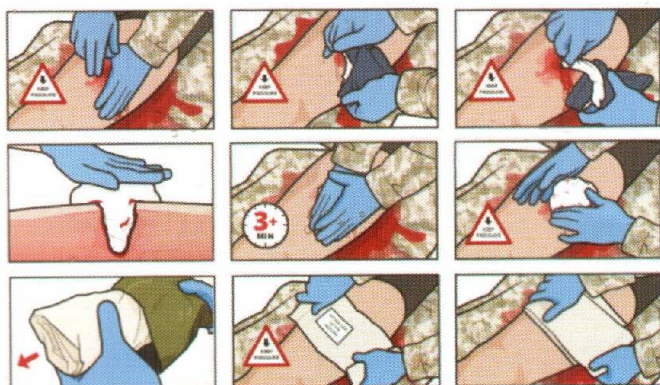

Intended Use :

Emergency situations such as;

- Battlefield
- Road accident
- Gun shot
- Stab wound
- Blast wound
- Surgical procedures
- Hospital casualties

How To Use :

Pack Size	Product Size
1's	5cm x 5cm
1's	10cm x 10cm
1's	15cm x 15cm
1's	10cm x 100cm Z Fold
1's	10cm x 150cm Z Fold
1's	15cm x 100cm Z Fold
1's	7.6cm x 150cm Z Fold

AQUASORB

CMC Wound Dressing

Aquasorb dressing is made from Carboxymethyl Cellulose (CMC) which absorbs excess fluid and converts into gel and maintains a moist healing environment ideal for moderate to heavy exuding wounds.

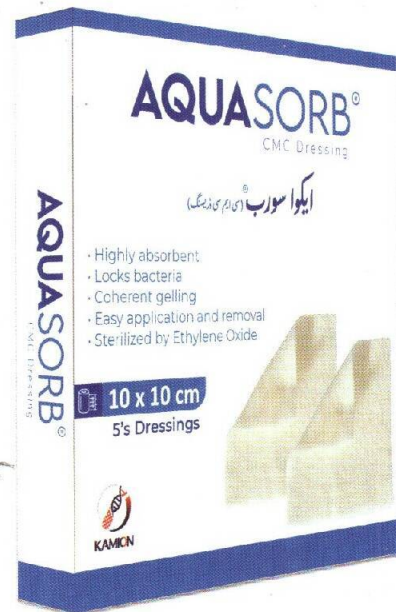

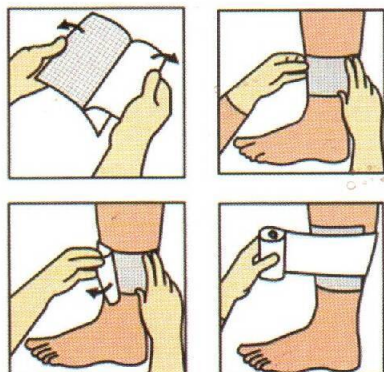

Features :

- Coherent gelling.
- Highly absorbent.
- Locks bacteria.
- Promotes moist healing environment.
- Excellent wet strength enables removal in one piece.
- Sterilized by Ethylene Oxide.

Clinical Cases :

How To Use :

Intended Use :

- Leg ulcers
- Pressure sores
- Diabetic ulcers
- Donor sites
- Abrasions
- Lacerations
- Post surgical wounds
- 1st and 2nd degree burns

Pack Size	Product Size
1 x 5's	5cm x 5cm
1 x 5's	5cm x 7.5cm
1 x 5's	7.5cm x 10cm
1 x 5's	10cm x 10cm
1 x 5's	10cm x 20cm
1 x 5's	15cm x 15cm
1 x 5's	15cm x 20cm
1 x 5's	2.5cm x 30cm
1 x 5's	2.5cm x 45cm

ALGI HEAL

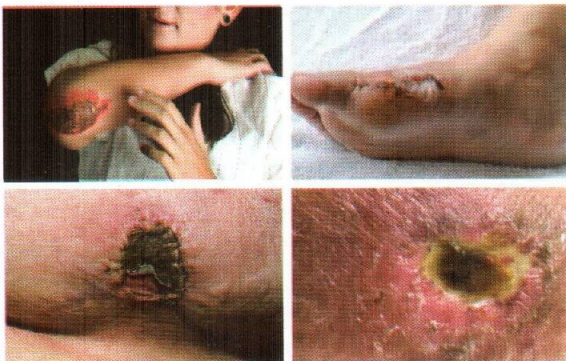

Calcium Alginate Dressing

Algi Heal is an advanced Calcium Alginate highly absorbent wound dressing made from Seaweed. It forms a gel with wound exudate, maintaining a moist environment to aid healing and reduce the risk of infections.

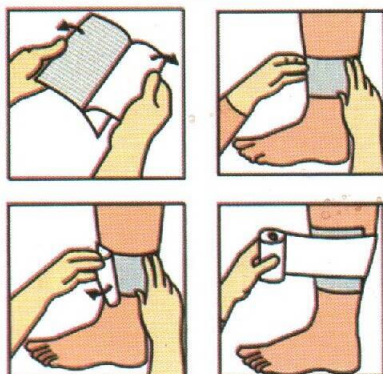

Features :

- Highly absorbent.
- Protects the affected area from bacterial infection.
- Promotes moist healing environment.
- Non-occlusive and non-adherent.
- Helps to control bleeding.
- Sterilized by Ethylene Oxide.

Clinical Cases :

How To Use :

Intended Use :

- Diabetic ulcers
- Pressure ulcers
- Donor sites
- Venous and arterial leg ulcers
- Traumatic wounds
- Surgical wounds
- Burns

Pack Size	Product Size
1 x 5's	5cm x 5cm
1 x 5's	5cm x 7.5cm
1 x 5's	7.5cm x 10cm
1 x 5's	10cm x 10cm
1 x 5's	15cm x 15cm
1 x 5's	10cm x 20cm
1 x 5's	2.5cm x 30cm
1 x 5's	2.5cm x 40cm

2

STERILE WOUND DRESSINGS

- Primepore
- Primepore Ultimate

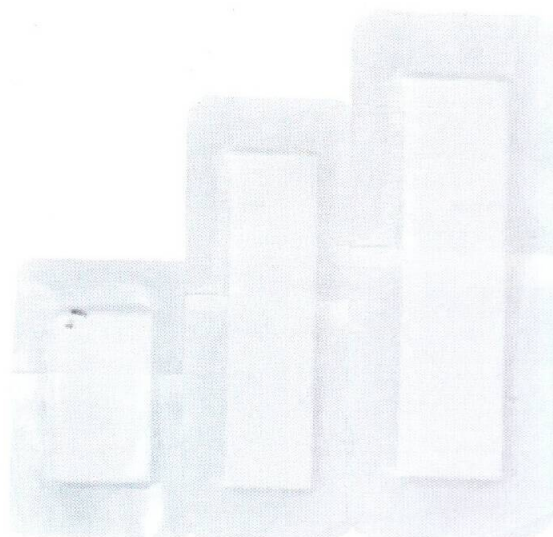

PRIMEPORE

Surgical Wound Dressing

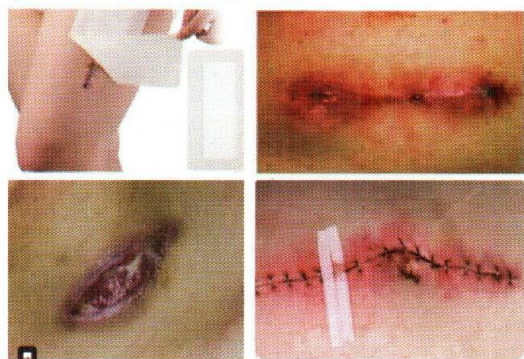

Primepore is a sterile self-adhesive non woven fabric wound dressing with absorbent pad designed for low to moderate exuding wounds.

Features :

- Secures the wound from contamination.
- Provides favorable environment for healing.
- Flexible and comfortable.
- Easy to apply and remove.
- Hypoallergenic and breathable.
- Latex-free adhesive.
- Sterilized by Ethylene Oxide.

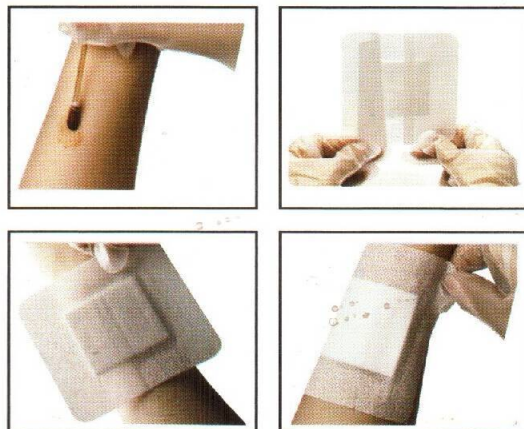

Clinical Cases :

Intended Use :

- Minor cuts and injuries
- Abrasions and punctures
- Lacerations
- Post operative wound care

How To Use :

Pack Size	Product Size
10's	5cm x 5cm
10's	6cm x 7cm
10's	7cm x 8cm
10's	9cm x 10cm
10's	9cm x 15cm
10's	9cm x 20cm
10's	9cm x 25cm
10's	9cm x 30cm

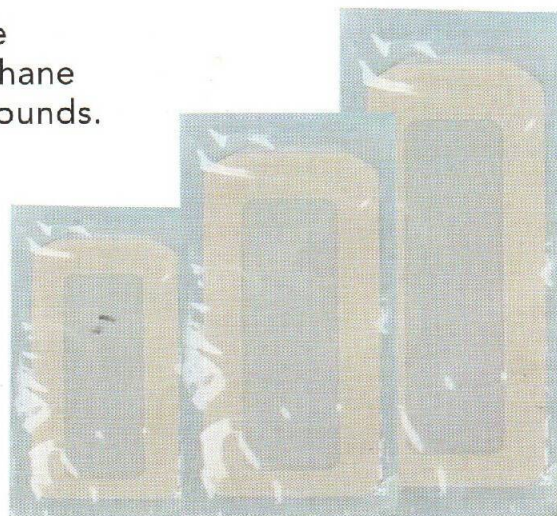

PRIMEPORE ULTIMATE

Surgical Wound Dressing

Primepore ultimate wound dressing is a sterile waterproof self-adhesive transparent Polyurethane dressing used for low to moderate exuding wounds.

Features :

- Gentle adhesive.
- Provides favorable environment for healing.
- Flexible, waterproof and comfortable.
- Easy to apply and remove.
- Hypoallergenic.
- Radio transparent.
- Latex-free adhesive.
- Sterilized by Ethylene Oxide.

Clinical Cases :

Intended Use :

- Wound care
- Post operative wound care
- Minor cuts and injuries
- Abrasion and punctures
- Lacerations

How To Use :

Pack Size	Product Size
10's	5cm x 5cm
10's	6cm x 7cm
10's	7cm x 8cm
10's	9cm x 10cm
10's	9cm x 15cm
10's	9cm x 20cm
10's	9cm x 25cm
10's	9cm x 30cm

3

STERILE TULLE DRESSINGS

- Kamitulle
- Kamigras
- Soft Tulle
- Polykam Tulle
- Fucitulle
- Kamizine Tulle

KAMITULLE

Framycetin Sulphate (1%BP)

Kamitulle is a sterile topical antibacterial tulle made from leno weave fabric impregnated with base compound Soft Paraffin and Framycetin Sulphate (1% BP) which is used to cure a variety of infected wounds.

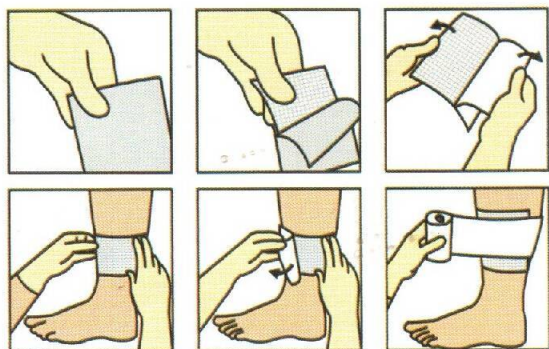

Features :

- Non-adherent and non-allergenic.
- Breathable and hasten healing.
- Provides moist environment to facilitate wound healing.
- Improve comfort for patients.
- Effective against wide range of bacterias.
- Sterilized by Electron-Beam radiation.

Clinical Cases :

How To Use :

Intended Use :

- Burn wounds
- Infected wounds
- Cuts
- Ulcers
- Abrasions
- Lacerations
- Skin grafts
- Bedsores

Pack Size	Product Size
1 x 10's	5cm x 5cm
1 x 10's	10cm x 10cm
1 x 10's	15cm x 15cm
1's	15cm x 150cm

KAMIGRAS

Chlorhexidine Acetate (0.5%BP)

Kamigras is a sterile antiseptic tulle made from leno weave fabric impregnated with Soft Paraffin base and 0.5% Chlorhexidine Acetate which protects and cures the wound from infection.

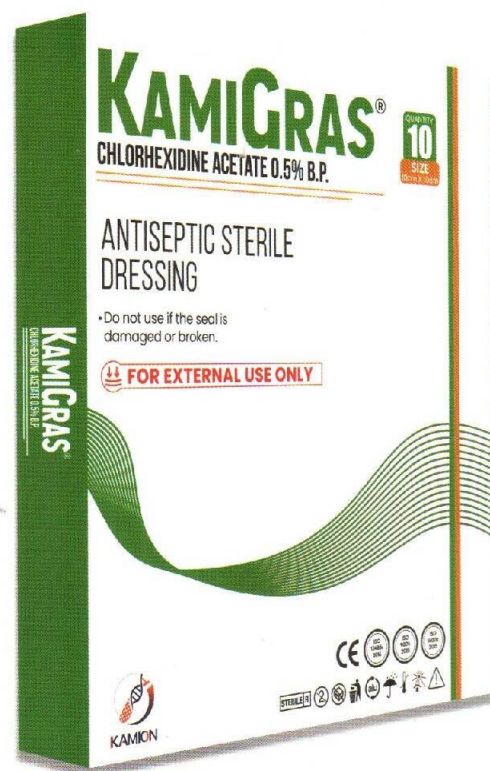

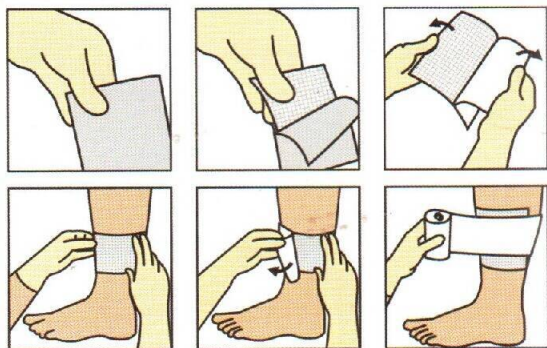

Features :

- Paraffin base soothes and protects the wound.
- Allows free passage for viscus exudates.
- Effective against wide range of gram +ve and gram -ve bacteria.
- Antiseptic efficacy unaffected by serum and blood.
- Sterilized by Electron-Beam radiation.

Clinical Cases :

How To Use :

Intended Use :

- Minor burns
- Infected wounds
- Cuts
- Ulcers
- Abrasions
- Lacerations
- Skin grafts

Pack Size	Product Size
1 x 10's	5cm x 5cm
1 x 10's	10cm x 10cm
1 x 10's	15cm x 15cm
1's	15cm x 150cm

SOFT TULLE

Paraffin (98%BP)

Soft Tulle is a sterile leno weave fabric coated with Soft Paraffin which is used to provide antiseptic properties to wounds and burns.

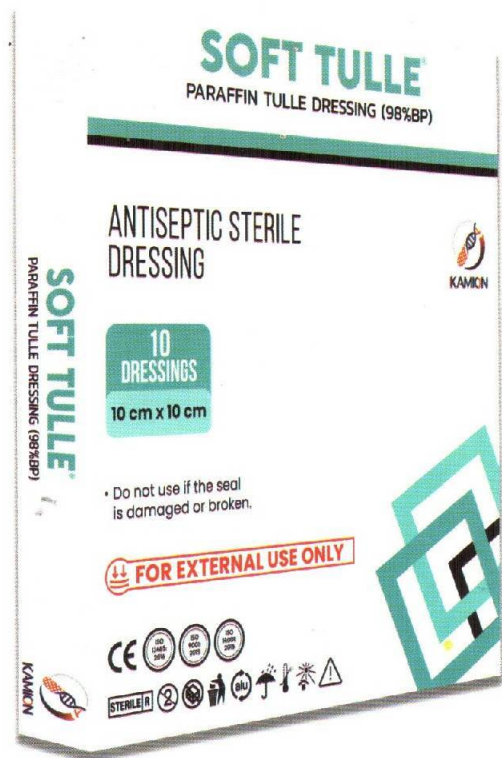

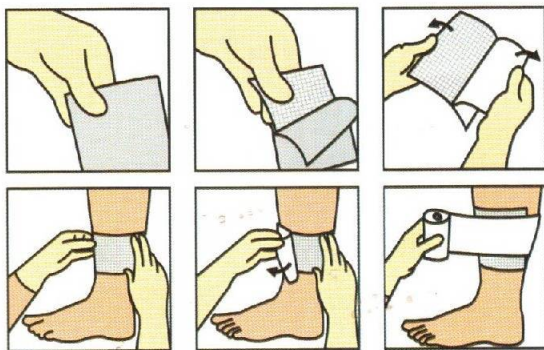

Features :

- Soothing and low adherent.
- Reduces risk of infection.
- Suitable for flat shallow wounds.
- Provides moist environment to facilitate wound healing.
- Sterilized by Electron-Beam radiation.

Clinical Cases :

How To Use :

Intended Use :

- Minor cuts
- Minor burns
- Minor wounds
- Abrasions
- Lacerations

Pack Size	Product Size
1 x 10's	5cm x 5cm
1 x 10's	10cm x 10cm
1 x 10's	15cm x 15cm
1's	15cm x 150cm

POLYKAM TULLE

Polymyxin B Sulphate, Bacitracin Zinc, Neomycin Sulphate

Polykam Tulle is a sterile antibacterial gauze made from leno weave fabric with base compound Soft Paraffin impregnated with triple antibiotics Polymyxin B Sulphate 5000 U, Bacitracin Zinc 400 U, Neomycin Sulphate 3400 U and Paraffin which is used for a wide range of topical infections.

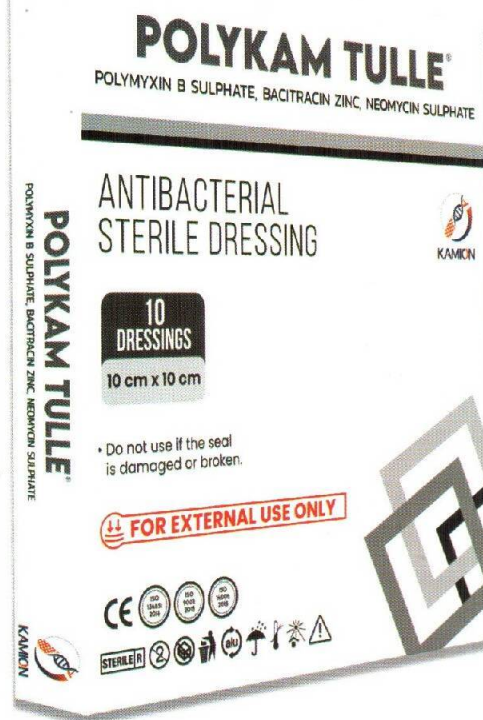

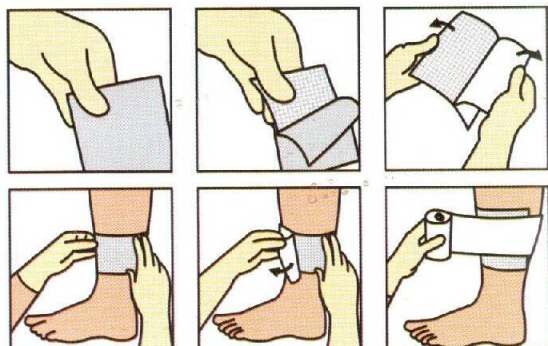

Features :

- Non-adherent and non-allergenic.
- Facilitates air circulation and hasten healing.
- Provides moist environment to facilitate wound healing.
- Broad spectrum antimicrobial activity effective against wide range of bacterial infections.
- Improves comfort for patients
- Sterilized by Electron-Beam radiation.

Clinical Cases :

How To Use :

Intended Use :

- Minor to moderate burns
- Ulcers
- Pressure sores
- Leg ulcers
- Infected wounds
- Surgical wounds
- Skin grafts

Pack Size	Product Size
1 x 10's	5cm x 5cm
1 x 10's	10cm x 10cm
1 x 10's	15cm x 15cm
1's	15cm x 150cm

FUCITULLE

Sodium Fusidate (1%BP)

Fucitulle is a sterile antibacterial leno weave fabric impregnated with Soft Paraffin base and 1% Sodium Fusidate which is used to treat skin and burn infections.

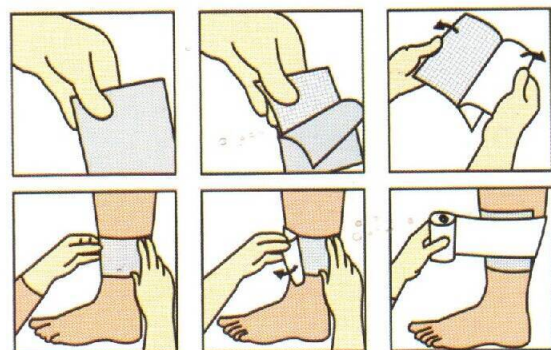

Features :

- Non-adherent and non-allergenic.
- Facilitate air circulation and hasten healing.
- Provides moist environment to facilitate wound healing.
- Highly effective in skin infections.
- Improves comfort for patients.
- Sterilized by Electron-Beam radiation.

Clinical Cases :

How To Use :

Intended Use :

- Infected wounds
- Cuts
- Burns
- Leg ulcer
- Skin grafts
- Abrasions
- Lacerations

Pack Size	Product Size
1 x 10's	5cm x 5cm
1 x 10's	10cm x 10cm
1 x 10's	15cm x 15cm
1's	15cm x 150cm

KAMIZINE TULLE

Silver Sulfadiazine (1%BP)

Kamizine tulle is a sterile leno weave fabric impregnated with Soft Paraffin base and 1% Silver Sulfadiazine, a topical antibiotic which is used to prevent and treat burns and infected wounds.

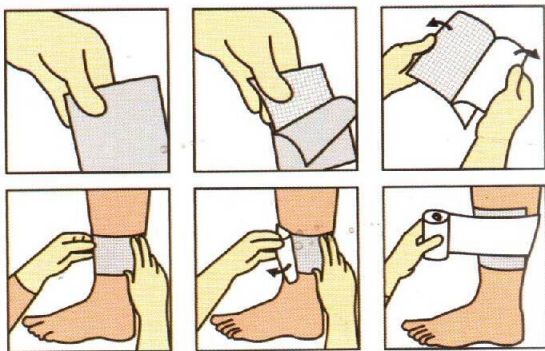

Features :

- Effective against 1st and 2nd degree burns.
- Non-adherent and non-allergenic.
- Facilitate air circulation and hasten healing.
- Provides moist environment to facilitate wound healing.
- Effective against wide range of bacteria.
- Improves comfort for patients.
- Sterilized by Electron-Beam radiation.

Clinical Cases :

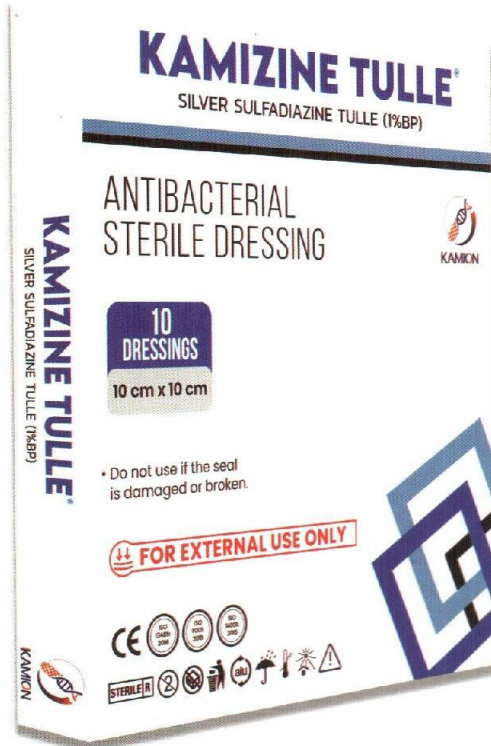

How To Use :

Intended Use :

- Moderate to severe burns
- Ulcers
- Pressure sores
- Leg ulcers
- Surgical wounds
- Skin grafts

Pack Size	Product Size
1 x 10's	5cm x 5cm
1 x 10's	10cm x 10cm
1 x 10's	15cm x 15cm
1's	15cm x 150cm

1 x 100's	25mm x 25mm
1 x 100's	38mm x 38mm

KAMICORN PLAST

Corn Plaster

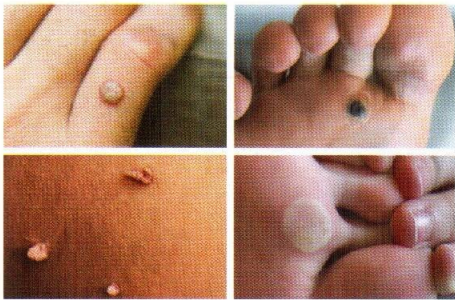

Kamicorn Plast is a medicated plaster coated with hypoallergenic hot melt adhesive on PVC film and an integrated Salicylic acid pad which is used to treat warts, corns and callus removal.

Features :

- Flexible, soft and easy to apply on different parts of body.
- Hypoallergenic.
- Salicylic Acid pad adherence promotes quick and natural healing.
- Breathable and water resistant material to protect the wound.
- Enables discreet and hassle free application.
- Latex-free adhesive.

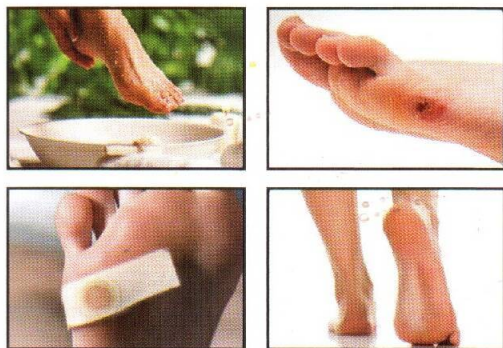

Clinical Cases :

Intended Use :

- Removal of corns
- Removal of warts
- Removal of callus

How To Use :

Pack Size	Product Size
1 x 10's	30mm x 80mm
1 x 10's	19mm x 72mm
1 x 10's	25mm x 25mm

5

PAIN RELIEF PATCHES

- Kamidonna
 - Heatplast
 - Relaxit
 - Easy Pas
- 
- A series of overlapping curved lines in dark red, light red, and white, sweeping from the bottom left towards the right.

KAMIDONNA

Belladonna Leaf Extract Plaster

Kamidonna is a self-adhesive medicated fabric plaster containing Belladonna Leaf Extract and Methyl Salicylate which stimulates blood flow to relief aches and pain.

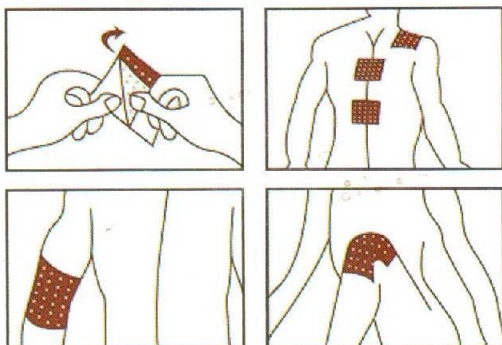

Features :

- Heals with induced heat.
- Desensitize nerve endings and induce blood flow.
- Adheres strongly to the skin to keep the plaster intact.
- Enables discreet and hassle free application.
- Thin and flexible for better comfort.
- Latex-free adhesive.

Clinical Cases :

How To Use :

Intended Use :

- Muscular tension and strains
- Neck stiffness
- Aching shoulders
- Backache
- Sciatica
- Lumbago
- Swollen joints

Pack Size	Product Size
1 x 10's	12cm x 18cm

HEATPLAST

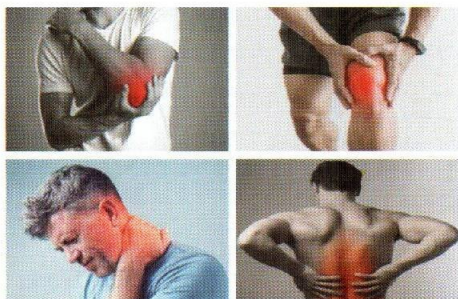

Capsicum Heatplaster

Heatplast is a self-adhesive medicated plaster which contains Capsicum Oleoresin and Methyl Salicylate providing relief from aches and pain by relaxing muscles through increasing blood flow, oxygen transport and nutrients to the cells.

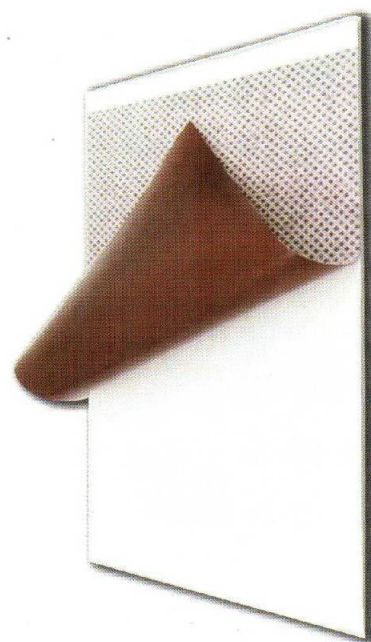

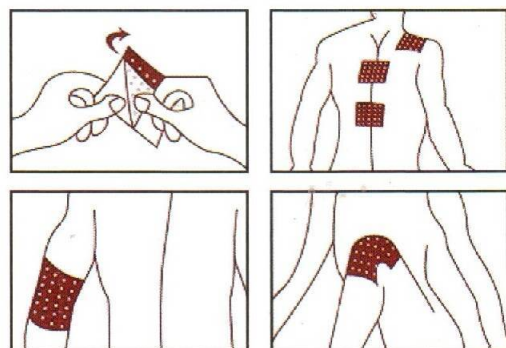

Features :

- Quick pain relief.
- Increases anti-inflammatory effects.
- Combination of two active ingredients provides synergistic effect.
- Adheres strongly to the skin to keep the plaster intact.
- Enables discreet and hassle free application.
- Latex-free adhesive.

Clinical Cases :

How To Use :

Intended Use :

- Muscular tension and strains
- Shoulder stiffness
- Aching shoulders
- Backache
- Swelling of nerves
- Swollen joints
- Lumbago
- Rheumatism

Pack Size	Product Size
1 x 10's	12cm x 18cm

RELAXIT

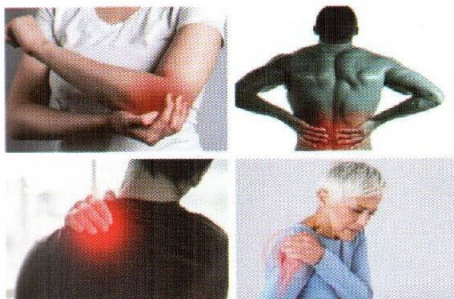

Diclofenac Sodium Transdermal Patch

Relaxit is a self-adhesive medicated non woven fabric plaster containing Diclofenac Sodium 140mg which provides fast relief from aches and pain by inhibiting prostaglandin synthesis.

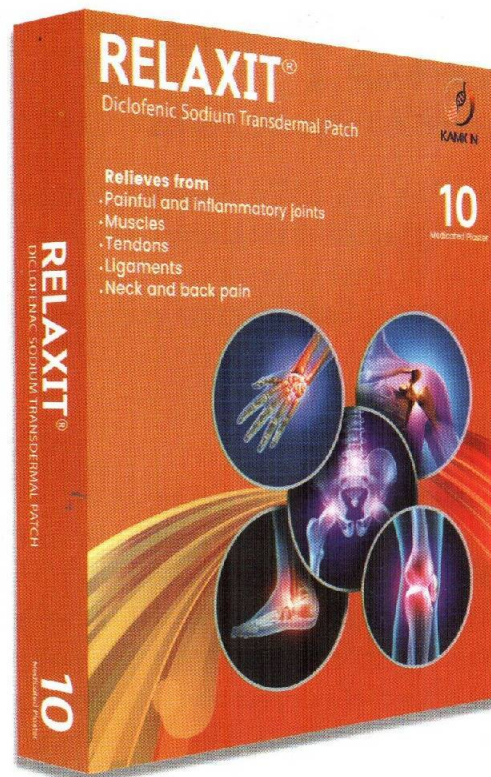

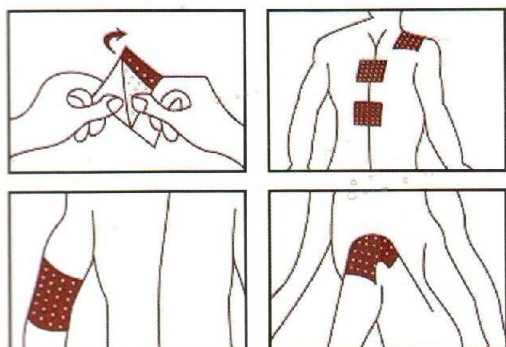

Features :

- Local, symptomatic, short term highly effective treatment for relieving pain and inflammation.
- Adheres strongly to the skin to keep the plaster intact.
- Enables discreet and hassle free application.
- Latex-free adhesive.

Clinical Cases :

How To Use :

Intended Use :

- Sports injury
- Muscular tension and strains
- Neck stiffness
- Aching shoulders
- Backache
- Sciatica
- Lumbago
- Rheumatism

Pack Size	Product Size
1 x 10's	10cm x 7cm
1 x 10's	10cm x 14cm

EASY PAS

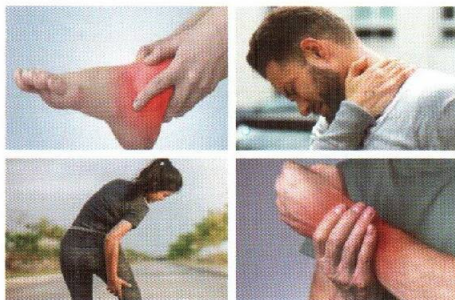

Topical Analgesic Patch

Easy Pas is a self-adhesive medicated fabric plaster containing Methyl Salicylate, Menthol and Camphor Thymol which provides relief in acute muscular pain and aches.

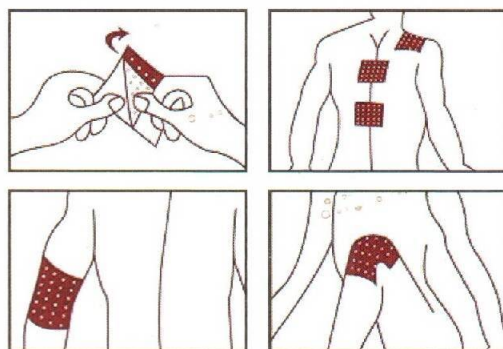

Features :

- Heals with induced heat.
- Desensitize nerve endings and induce blood flow.
- Adheres strongly to the skin to keep the plaster intact.
- Enables discreet and hassle free application.
- Provides soothing and cooling effects.
- Latex-free adhesive.

Clinical Cases :

How To Use :

Intended Use :

- Muscular tension and strains
- Shoulder stiffness
- Aching shoulders
- Backache
- Lumbago
- Sprains
- Bruises

Pack Size	Product Size
1 x 20's	6cm x 4cm
1 x 20's	7.5cm x 4cm
1 x 20's	10cm x 7cm
1 x 20's	10cm x 14cm

6

SURGICAL TAPES

- Kamipore
- Kamifab
- Kamiclear
- Kamizinc
- Kamifix

KAMIPORE

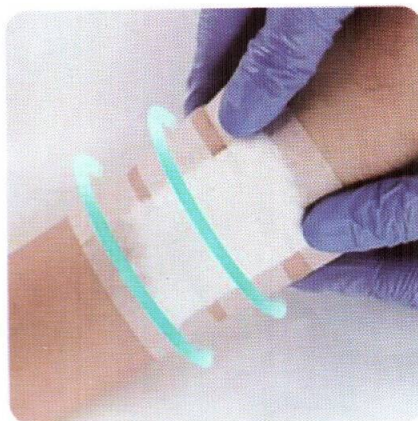

Surgical Paper Tape

Kamipore is non-woven paper surgical tape coated with latex-free adhesive used to support medical devices such as dressings and splints.

Features :

- Easy to apply.
- Easy to peel off.
- Latex-free adhesive.
- Gentle, breathable and hypoallergenic.

Clinical Uses :

Intended Use :

- To hold the dressing in place
- Fixation of cannula
- To support catheters
- Babies with fragile skin
- Elderly patients with dry or fragile skin
- Patients undergoing radiation

Pack Size	Product Size
1 x 24's	1.25cm x 4.5m
1 x 12's	2.5cm x 4.5m
1 x 6's	5cm x 4.5m
1 x 3's	7.5cm x 4.5m
1 x 3's	10cm x 4.5m

KAMIFAB

Non Woven Fabric Surgical Tape

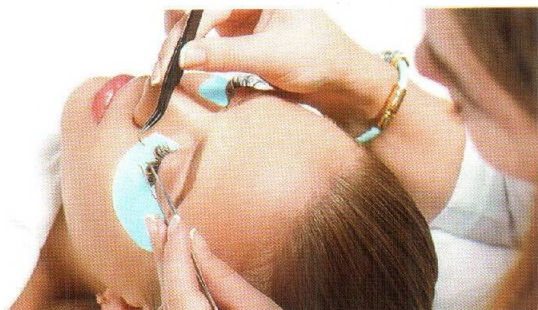

Kamifab is a non-woven fabric surgical tape used to support medical devices such as dressings and splints.

Features :

- Easy to apply.
- Latex-free adhesive.
- Easy to peel off.
- Gentle, breathable & hypoallergenic.
- Available in different attractive colours.

Clinical Uses :

Intended Use :

- To hold the dressing in place
- To fixation of cannulas, catheters and medical equipments
- Babies with fragile skin
- Elderly patients with fragile or dry skin
- Radiotherapy and dialysis patients
- Cosmetic surgery (Eye lash extension)

Pack Size	Product Size
1 x 24's	1.25cm x 4.5m
1 x 12's	2.5cm x 4.5m
1 x 6's	5cm x 4.5m
1 x 3's	7.5cm x 4.5m

KAMIZINC

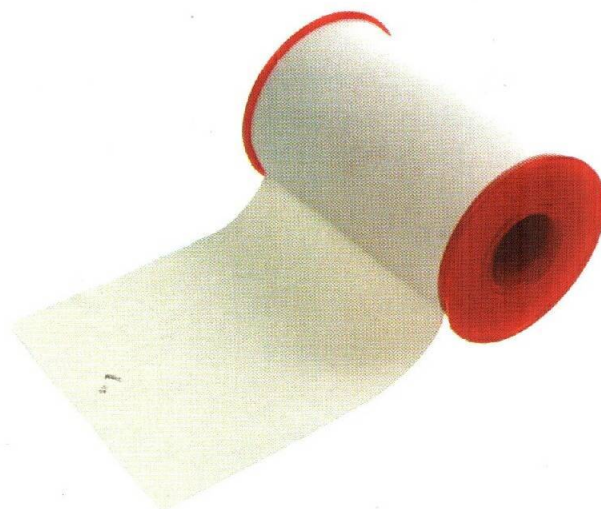

Zinc Oxide Surgical Tape

Kamizinc is a surgical tape infused with Zinc oxide, a natural antimicrobial and antiseptic agent designed for securing dressings, bandages and other medical devices.

Features :

- Helps to promote wound healing.
- Hypoallergenic and breathable.
- Strong adhesion.
- Easy to use.
- Latex-free adhesive.
- High tensile strength, not easy to tear.

Clinical Uses :

Intended Use :

- Used in post surgical procedures for fixation of dressings
- Fixation of cannulas and catheters
- Used for sports injury protection

Pack Size	Product Size
1 x 24's	1.25cm x 5m
1 x 12's	2.5cm x 5m
1 x 6's	5cm x 5m
1 x 3's	7.5cm x 5m
1 x 3's	10cm x 5m

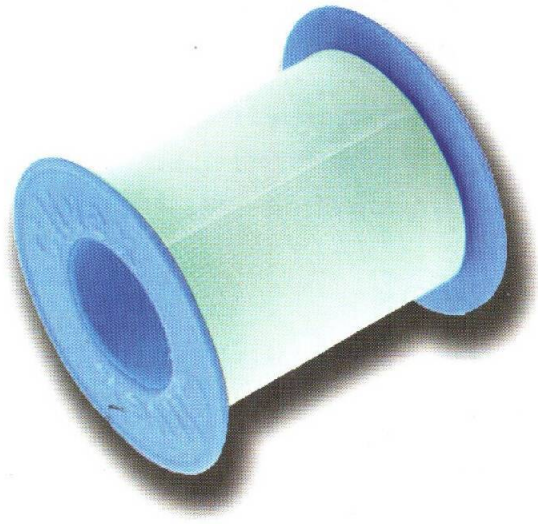

KAMICLEAR

Transparent Surgical Tape

Kamiclear is a porous and transparent polyethylene surgical tape used to secure medical devices like dressings and splints.

Features :

- Flexible, soft and breathable.
- Easy to apply and peel off.
- Hypoallergenic and air permeable.
- Latex-free adhesive.
- Allows visualization of the skin.

Clinical Uses :

Intended Use :

- Used to hold or fixation of dressings in place
- Support or fixation of cannulas and catheters

Pack Size	Product Size
1 x 24's	1.25cm x 4.5m
1 x 12's	2.5cm x 4.5m
1 x 6's	5cm x 4.5m
1 x 3's	7.5cm x 4.5m

KAMIFIX

Surgical Dressing Roll

Kamifix is non-woven adhesive fabric surgical dressing roll used for securing various medical devices and dressings.

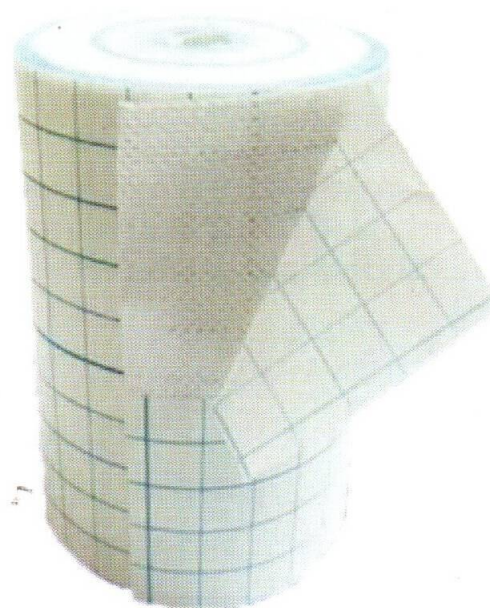

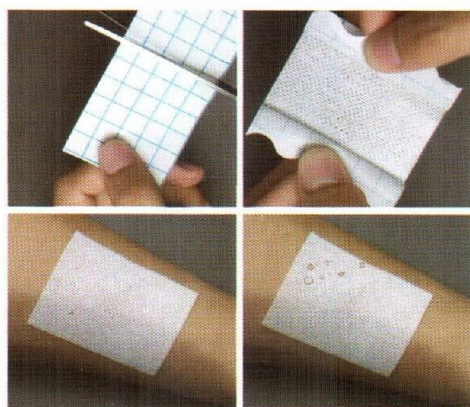

Features :

- Soft and flexible.
- Hypoallergenic and breathable.
- Easy to apply and remove.
- Latex-free adhesive.
- Water and sweat resistant.

Clinical Uses :

How To Use :

Intended Use :

- To hold or fixation of dressings in place
- Support primary dressings
- Secure medical devices
- Fixation of cannulas and catheters

Pack Size	Product Size
1's	2.5cm x 10m
1's	5cm x 10m
1's	7.5cm x 10m
1's	10cm x 10m
1's	15cm x 10m
1's	20cm x 10m
1's	25cm x 10m
1's	30cm x 10m

Bandage BPC

EASY FIT

Cohesive Bandage

Easy Fit cohesive bandage is a self-adherent bandage that sticks to itself and not to skin, hair or clothing. Essential in medical care, sports and veterinary use.

Features :

- Safely secures dressing and devices.
- Quick and easy hand tear.
- Soft, breathable and light weight.
- Self adherent eliminates the use of clips or fastener.
- Available in multiple widths and colours.

Clinical Uses :

Intended Use :

- Post surgical immobilization
- Securing splints and covering plaster casts
- As an alternative to dressing retention tape.
- Injury recovery and first aid
- Provide compression and support to soft tissue injury

Pack Size	Product Size
1's	2.5cm x 4.5m
1's	5cm x 4.5m
1's	7.5cm x 4.5m
1's	10cm x 4.5m
1's	15cm x 4.5m

KAMICREPE

Crepe Bandage

Kamicrope bandage is plain weave fabric having a high stretch in the warp direction due to the amount of twist in the warp yarns.

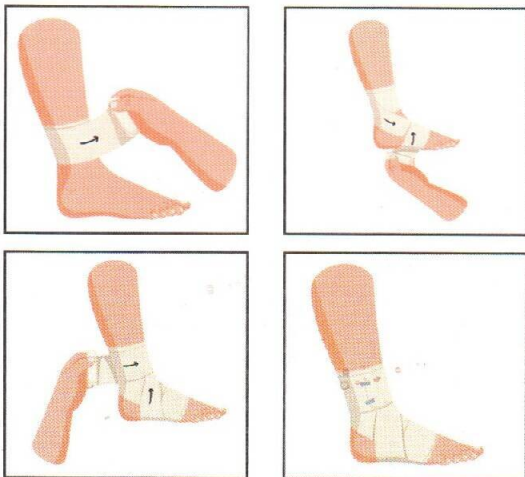

Features :

- Reusable after washing.
- Non-fray edges improves patient comfort.
- Flexible and breathable.

Clinical Cases :

How To Use :

Intended Use :

- Treatment of varicose venous ulcers
- Provides compression post surgery or light orthopedic support
- Ideal bandage for supporting joints and ligaments after strains and sprains

Pack Size	Product Size
1's	5cm x 4.5m
1's	7.5cm x 4.5m
1's	10cm x 4.5m
1's	15cm x 4.5m

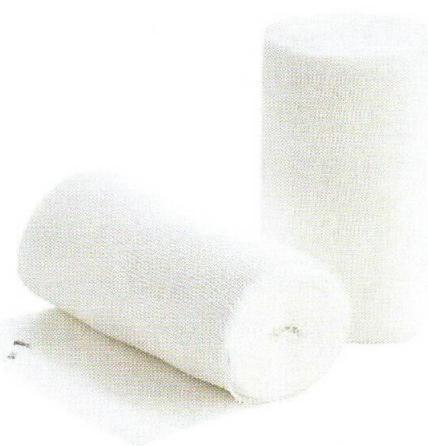

KAMISURGICAL BANDAGE BP TYPE II

Open Weave Cotton Bandage

Kamisurgical Bandage is a white open weave traditionally non-stretch cotton bandage, most suited for inelastic bandaging and secure dressing in a place.

Features :

- Made from high grade 100% cotton.
- Non-stretchable and non-elastic in nature.
- Convenient, faster and easier handling.
- Soft and air permeable.

Clinical Cases :

Intended Use :

- As a secondary layer to secure dressing in place

How To Use :

Pack Size	Product Size
1's	5cm x 3m
1's	5cm x 4.5m
1's	7.5cm x 3m
1's	7.5cm x 4.5m
1's	10cm x 3m
1's	10cm x 4.5m
1's	15cm x 3m
1's	15cm x 4.5m

KAMISURGICAL BANDAGE BPC

Cotton Fabric Bandage

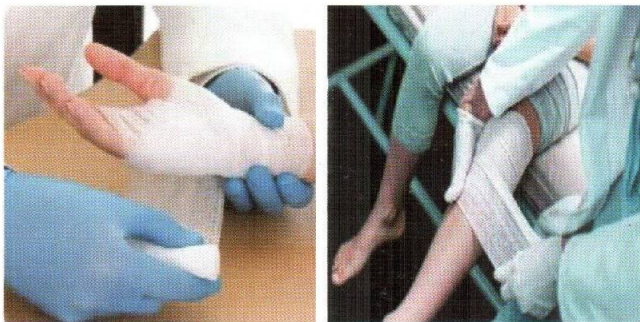

Kamisurgical Bandage BPC is used to support medical devices like dressings or splints or to limit the movement.

Features :

- Made from high grade 100% cotton.
- Non stretchable and non-elastic in nature.
- Convenient, faster and easier handling.
- Soft and air permeable.

Clinical Cases :

Intended Use :

- To hold dressing in place over wounds or provides support on its own

How To Use :

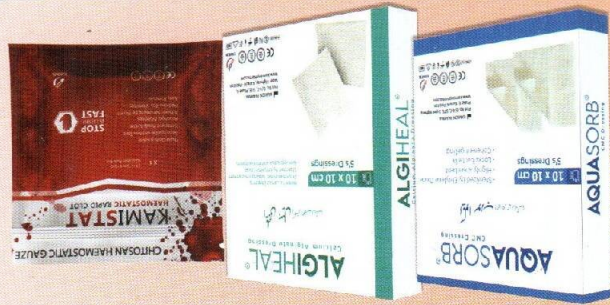

Pack Size	Product Size
